PDX
Fully Digital. Ultra Compact. Powerful.

Extraordinary in concept, revolutionary in design – PDX amplifiers power your system like never before. Drawing on AlpineF#1Status Microdynamics technology and an all new digital architecture, PDX set the benchmark with new heights of power density and precise sonic purity in a stylish ultra-compact design.

PDX Multi-Channel Power Amplifiers

No longer do you have to sacrifice space for high power or sound quality. Behind their remarkably compact and elegant chassis, PDX amplifiers range a number of sound technologies that answer the challenge of conventional digital switching amplifiers. Equipped with an all new and completely innovative full range digital design technology, PDX rivals the sonic purity of even the best Class A/B switching amplifiers.

Available in both bridgeable four and two channel formats, these amplifiers can be configured to build any high-end audiophile system or serious competition system. Highly compact and highly efficient, PDX amplifiers are the ultimate high-fidelity solution for any premium audio system.

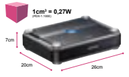
Stackable Mountable Installation

PDX amplifiers combine industry first clever design and function. All PDX amplifiers share a common chassis size, this allows aesthetically balanced installations, but also ingenious stackable mounting.

Incredible Power Density

PDX amplifiers are an industry innovation delivering high power output in an ultra compact chassis. The PDX-1.1000, for example produces an impressive 0.27 power density ratio (watts per cubic centimeter). Conventional amplifiers usually achieve a power density ratio of 0.13.



Type-X
Audiophile performance

It's a natural fact. Alpine's Type-X speakers take your in-car sound to another level. They deliver tight, deep bass, and a detailed, authentic response over the entire frequency spectrum. So you can experience the power and emotion of your favourite music.

V12
High power, greater control

Alpine V12 amplifiers are packed with power, quality and versatility making them the first choice for your high power sound quality system. Using AlpineF#1Status trickle down technology, they are equipped with high quality components for superior performance with no-shutdown operation and remarkable sound quality.

Limitless flexibility, powerful performance, precise system tuning

The powerful V12 series has the flexibility to create virtually any system configuration imaginable. Its MultiMode capability enables a wide-range of system applications, plus with the Bass EQ and built-in digital crossovers you have precision system tuning. Whether it's a comprehensive competition system, or a modest high performance system, V12 is the perfect choice.
